Subject: Oxitec EUP date of issuance?

Mike and/or Eric,

I believe I've asked this before, and I think that the answer is "April 30." However, there might still be some confusion as to when, precisely, the EUP was issued. I see that the letter was signed April 30, and the FR Notice of Issuance says it's effective as of "April 30." However, there was an "OPP Update" that said "May 1," and CFS also apparently thinks it was issued May 1.

Can you please verify for me that the correct "date of issuance" is April 30, 2020?

Thanks!

- Ben
